SOFT LANDING PROVENCE AFRICA CONNECT 2026

eventra.cloud

Africa's event industry is booming. The tools **weren't built for it.**

Fragmented tools: Event organizers in Africa stitch together 4-5 separate platforms — one for registration, one for the website, one for emails, one for networking, one for ticketing.

Western-only platforms: Eventbrite, Hopin, and Bizzabo are English-first, priced at \$500–\$18,000/year, and ignore multilingual audiences, B2B trade missions, and institutional events.

No digital infrastructure: The Africa-Europe business corridor — trade missions, investment summits, innovation forums — still relies on spreadsheets and WhatsApp groups.
